Bee Cave, Texas 78738

Re: City of Bee Cave Phase II MS4 - Year 5 Annual Report Review  
TPDES Permit Authorization No. TXR040453, (CN600680920; RN105808828)

Dear Mr. Garza:

We have received the annual report for the City of Bee cave Phase II MS4 that was submitted on March 28, 2019, for the Year 5 reporting period for the above-referenced permit authorization. We have performed an administrative and technical review of this report and based on the information provided it appears that your annual report includes all of the required information.

Please note that additional information or revisions may be required as a result of an inspection or an audit to determine compliance with the approved municipal separate storm sewer system (MS4) Stormwater Management Program (SWMP) and the Phase II MS4 General Permit TXR040000.

The annual report is due within 90 days of each reporting year as specified in your Notice of Intent (NOI). The Texas Commission on Environmental Quality (TCEQ) has an annual report form (TCEQ-20561) available, and the MS4 operators must use the template when preparing and submitting subsequent reports (See Part IV.B.2 of the general permit). This will greatly assist us in reviewing the reports and will help to ensure that you include all the required elements. The form is available at the TCEQ website at: [https://www.tceq.texas.gov/search\\_forms.html](https://www.tceq.texas.gov/search_forms.html). After you open the webpage scroll down to *Current Form Search*, enter 20561 in the box under *Form Number*, and click on *Submit* to download the annual report form.

**Please make sure to forward a copy of your annual report to your local TCEQ regional office, as well as an updated version including any revisions made as a result of our review process.**

Mr. Clint Garza, City Manager

Finally, please be aware that discharges of the pollutant(s) of concern to impaired water bodies for which there is a total maximum daily load (TMDL) implementation plan are not eligible for coverage under the Phase II MS4 General Permit unless they are consistent with the approved TMDL and the associated implementation plan. Permitted MS4 operators must incorporate the limitations, conditions and requirements applicable to their discharges, including monitoring frequency and reporting required by TCEQ rules, into their SWMP in order to continue to be eligible for coverage under the general permit. If the discharge is no longer eligible for coverage under the Phase II MS4 General Permit, then the MS4 operator would be required to apply for an individual TPDES permit.

If you have any questions about the information in this letter, please do not hesitate to contact me (512) 239-4671.

Sincerely,

Dan Siebeneicher, Permit Writer  
Stormwater Team (MC-148)  
Water Quality Division  
Texas Commission on Environmental Quality
